

### LUNCHTIME LEAD COLORING PAGE

NAME: \_\_\_\_\_

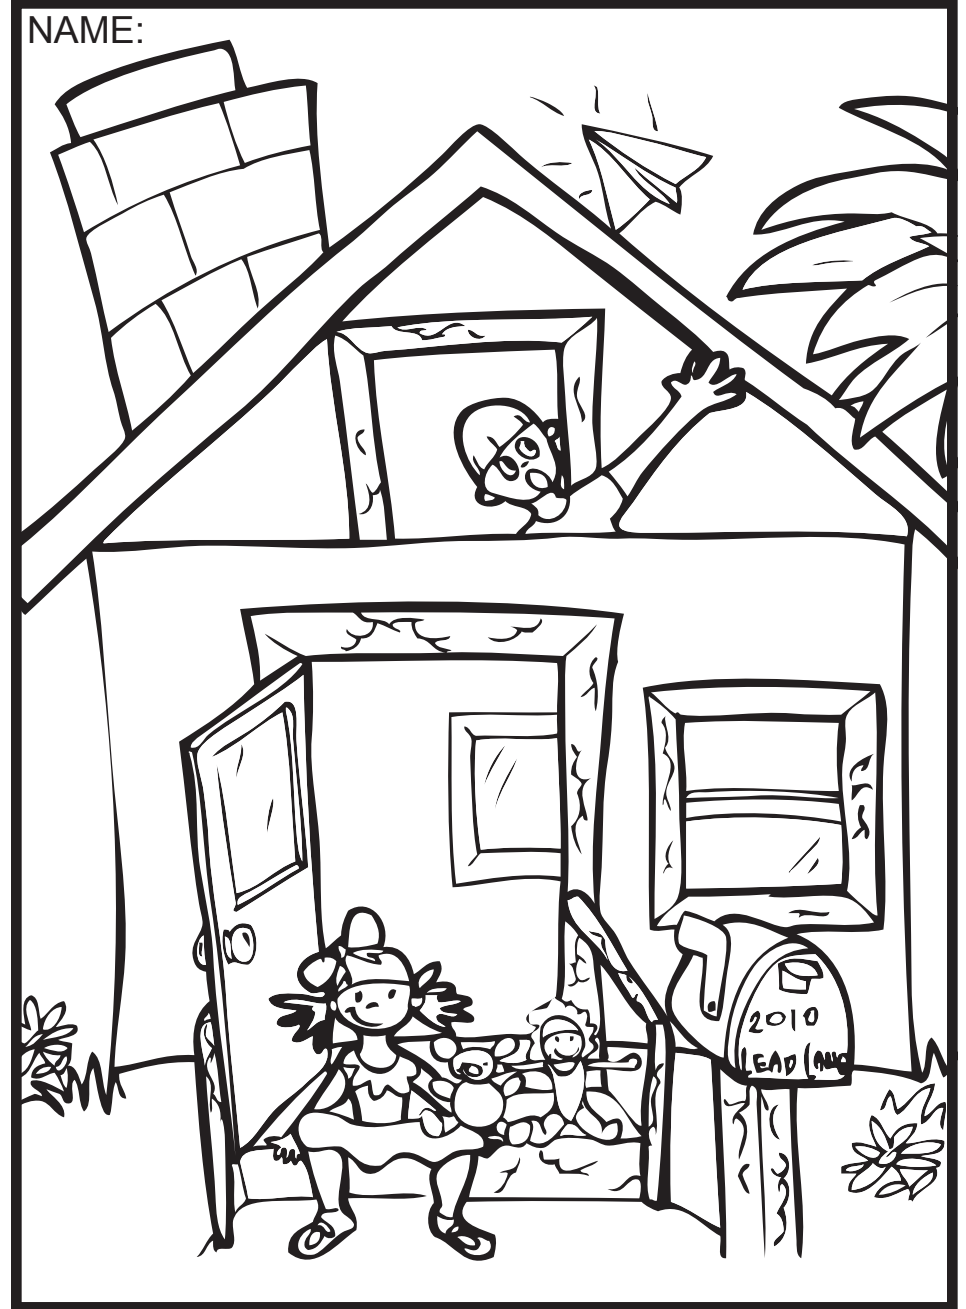

Window sills and door frames are the most dangerous lead areas in the home. Chipping and peeling lead can be swallowed by children and cause many health problems.

For more information, please contact Grondin Construction, Inc. at (858) 549-1682. Permission is granted to copy and distribute this page.

### LEAD LANE COLORING PAGE

NAME: \_\_\_\_\_

When children play outdoors it is easy for them to pick up lead from peeling home exteriors. Steps and railings are high risk lead areas.

For more information, please contact Grondin Construction, Inc. at (858) 549-1682. Permission is granted to copy and distribute this page.

### LEAD COLORING PAGE

Lead can land on toys, remote controls and other objects children often touch and put in their mouths.

### LEAD CAN CHIP OFF FURNITURE, TOO...

Lead can peel off older furniture where children can easily pick it off and ingest it.

For more information, please contact Grondin Construction, Inc. at (858) 549-1682.
